Art Unit: 1775

1. Applicant's election with traverse of Group II in Paper No. 9 is acknowledged. The traversal is on the ground(s) that it is unclear how the coating could be made by CVD. This is not found persuasive because CVD, or chemical vapor deposition is a known technique used in the coating art to produce coatings.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 24-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 24, the phrase 'said elements' in line 3, lacks clear antecedent basis, rendering all the claims indefinite.

In claim 24, it is unclear the positioning of the first surface region to the second, rendering the claims indefinite.

In claim 25 and 26, the phrase 'as well as any contaminants', renders these claims indefinite.

Art Unit: 1775

In claim 29, the phrase, 'including any bonding layer', renders the claim indefinite.

5. Regarding claim 27, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

6. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 30 recites the broad recitation of a thickness, and the claim also recites a narrower thickness which is the narrower statement of the range/limitation.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 24-25, 27-30 are rejected under 35 U.S.C. 102(e) as being anticipated by DeWald, Jr. et al (5,928,771).

As best construed by the language of the claims, DeWald Jr. et al discloses the claimed invention. DeWald Jr. et al discloses a boron and carbon coating, with the claimed coating between that coating and the substrate, within the claimed thickness.

9. Claims 24-25, 27-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Energy Conversion (EP 0 179 582) or Weissmantel et al (4,731,302).

Art Unit: 1775

As best construed by the language of the claims, Energy Conversion or Weissmantel et al discloses the claimed invention. Energy Conversion or Weissmantel et al discloses a boron and carbon coating, with the claimed coating between that coating and the substrate, within the claimed thickness.
